Facts About Cosmetic Dentistry

1. Did you know, your smile is one of the first things people notice about you? Your smile communicates a message about you to the world. If you are unhappy with your teeth, you may be hiding the real you!
2. Cosmetic Dentistry mixes art and dental science to create beautiful smiles. The aim of Cosmetic Dentistry is to create aesthetically pleasing smiles.
3. Cosmetic Dentistry treatment has the power to change lives. Just a few of the major benefits, Cosmetic Dentistry treatment may provide patients include;
 - Improved confidence and self-esteem
 - Improved oral health and general well-being
 - Improved facial appearance
 - Improved comfort
 - Improved speech
4. Candidates for Cosmetic Dentistry may include anyone who wishes to enhance the appearance of their smile. Previously, little could be done to attain the smile you always dreamed of. The treatments available to treat chipped, stained or crooked teeth were limited. Yet, today with the vast range of Cosmetic Dentistry treatments available, every smile can be aesthetically enhanced.
5. Some of the results Cosmetic Dentistry treatment can achieve include:
 - Rejuvenate discolored / stained teeth
 - Close gaps between teeth
 - Reduce the over-crowded nature of teeth
 - Straighten overlapping or crooked teeth
 - Cover chips
 - Conceal blemishes
 - Replace missing teeth
 - Repair breakages
 - Replace Amalgam Fillings with Tooth-colored Restorations
 - Gum Re-contouring for gummy smiles
